

Do you spend too much time thinking about O-rings

We can help.

IntegraSeal™

Purity & Security Molded In!

Introducing IntegraSeal Caps with Molded O-Rings

New technology molds the O-ring directly into the cap, eliminating potential contamination from outsourced O-rings or operator handling.

Securely bonded. The O-ring can't fall out.

NO possibility of **double O-rings.**

100% inline **optical inspection** ensures quality.

No contamination from outsourced materials or handling.

IntegraSeal™ Caps

- Medical-grade polypropylene with an inert TPE O-ring molded directly into the cap.
- Available in standard cap or tethered.
- Available in colors for branding or organization.
- Easy ¾ turn to open and close.

Molded O-Ring

Compatible with SureSeal tubes in 0.5, 1.5, and 2.0 mL volumes.
